Wellington Avenue Sanitary Sewer Interceptor Replacement Project

Permanent Roadway Restoration

On Monday May 2, 2011 work will begin on the permanent road restoration on Wellington Avenue related to the Wellington Avenue Sanitary Sewer Interceptor Replacement project. The entire width of the eastbound travel lane on Wellington Avenue from Halidon Avenue to Marchant Street will be repaired. The repair work will be completed in two phases beginning with minor trench repairs and the milling of the road surface in the eastbound travel lane followed by paving the travel lane from centerline to edge of road.

Work will be performed during normal daytime working hours. During the work hours there may be times when road access is limited. Traffic delays can be expected on Wellington Avenue. Alternate routes are advised to be used in order to avoid the construction area. Throughout the roadway restoration work, traffic control will be coordinated with the contractor and the Newport Police Department at all times. The Department of Utilities appreciates the community's cooperation and patience during this sanitary sewer improvement project.
